

Powercity

Load Bank

Model: PDL-600

600 KW Rated Load

Load Banks made by Powercity are designed in conformance with European Standards and are certified by independent testing laboratory. Tested in conformity with European Standards EN 55011:2007 and EN 61000-4 and certified by SAPO Certification and Testing Laboratory Limited of United Kingdom with certificate number SP1001GZ1111416. Powercity Load Banks are designed to provide a stable and controllable load for determining the performance characteristics of AC generators. A load bank verifies the rated power of a generator set; it verifies if the engine is properly sized of has the sufficient mechanical power (kWm) to the drive the alternator at full load; it checks the efficiency of the cooling system; it detects problems of the generator; it decarbonizes engine and prevents wet stacking of diesel engine in generators operating on light load.

Features:

- Resistive load elements.
- 600 Kilowatts rated load with variable adjuster.
- Toggle switch for accurate fixed load steps.
- Digital display for Power, Voltage, Frequency and Power Factor.

Specifications

Model:	PDL-600
Rated load:	600 Kilowatts
Phase:	3-Phase
Rated voltage:	180-240 or 380-440 AC
Rated frequency:	50 Hz / 60 Hz
Enclosure:	NEMA 1
Dimensions (mm) L x W x H	2100 x 1700 x 1970
Weight (Kg):	250

Note: Due to continuous product improvement, the manufacturer reserves the right to change the design or specification without notice and without any obligation or liability whatsoever.

Standards

EN 55011:2007 - Industrial, scientific and medical equipment - Radio-frequency disturbance characteristics - Limits and methods of measurement.

EN 61000-4 – Electromagnetic Compatibility

Quality Assurance:

ISO 9001:2008

Certificate No. U13Q2GZ682452F1M

Manufactured by:

Powercity Electromechanical & Equipment Co Ltd
Fujian, China

Distributed in the Philippines by:

Powercity Corporation

Km. 20, East Service Road, Muntinlupa City
Metro Manila, Philippines
